

STACEY BRANDSMA

AI Product Leader • Human-Centered Designer • Public Health Enthusiast

associate director ~ digital product management
msc computer science, msc analytics, bsc biology

Skills

Research Methods	Quantitative Research, Experimental Design, Statistical Analysis, Causal Inference, Data Collection and Analysis, User Research, Usability Testing
Human Factors	Human-Computer Interaction, Decision Support, Cognitive Biases and Heuristics, Journey Mapping, Prototyping, Design Thinking
Technical	Machine Learning, NLP, Generative AI, Python, R, Model Evaluation
Healthcare AI	Clinical Decision Support, AI-Augmented Decision-Making, Patient Safety, Risk Assessment, Responsible AI
Collaboration	Interdisciplinary Collaboration, Stakeholder Engagement, Requirements Gathering, Research Communication, Mentorship
Languages	Native English, Intermediate Dutch, Beginner French

Experience

- 02/2025–present **Associate Director Digital Product Management, Amgen, AI Innovation Lab**
- **Product Management & User Experience**
 - Drive AI product strategy for Global Patient Safety: defining the vision, roadmap, and measurable outcomes for high value AI initiatives.
 - Lead design and delivery of AI-enabled decision support systems: supporting regulatory safety requirements, adverse event risk assessments, and pharmacovigilance signal detection
 - Partner with data science and engineering teams to build solutions that align with business value, compliance, and user expectations.
 - Oversee UX research, design strategy, and interface development, ensuring AI products are intuitive, trustworthy, and seamlessly integrated into user's workflows.
 - **Cross Functional Delivery Leadership**
 - Act as a strategic advisor and thought partner for Global Patient Safety, aligning innovation priorities with enterprise digital-transformation goals.
 - Drive AI adoption and change management, accelerating AI readiness and use.
 - Facilitated the development and implementation of product management best practices for developing and building effective AI solutions at Amgen.
 - **Strategic and People Leadership**
 - Facilitate visioning and strategy workshops to align stakeholders across Technology, AI, R&D, and Safety.
 - Manage and mentor direct reports and early-career professionals, building capabilities in product management, UX design, and data-driven strategy.
 - Champion continuous learning and professional growth, staying current with emerging AI, product management, and design practices to inform strategic direction.

07/2021–03/2025 **Principal Data Scientist, Amgen, Digital Health & Innovation**

- **Strategic & Domain Leadership**

- Co-led enterprise AI taskforces for Obesity, Rare Disease, and Safety; defined use cases and roadmap priorities.
- Key contributor to Amgen's precision medicine strategy via executive workshops on future AI capabilities.

- **Product & Technical Execution**

- Led discovery and MVP delivery for AI tools in safety signal evaluation, trial optimization, and document automation.
- Built AI-driven executive tools using NLP for summarization, Q&A, topic modeling, sentiment analysis, and forecasting.
- Developed ML models for osteoporosis detection and scaled deployment strategies.
- Integrated computer vision pipeline for analyzing cell painting images.
- Authored internal white paper on clinical AI adoption across therapeutic areas.

- **Collaboration & Culture Building**

- Vice Chair for Amgen's Data Science Symposium; led AI Demo Days and Tech Talks to scale AI awareness.
- Co-led AI Learning Lab to expand organizational AI literacy.
- Led AI mentoring program; improved mentor matching with ML and supported junior team growth.
- Promoted cross-functional collaboration through journal clubs, pilots, and innovation showcases.

2021 **Data Scientist 2, Parsyl**

2020 **Data Scientist, HCA Healthcare**

2018-2020 **Data Scientist, Johnson & Johnson**

2014-2018 **Monitoring & Evaluation Officer, MCC, Zambia**

Education

Master of Science in Computer Science, Georgia Tech, GPA: 4.0

- Specialized in Interactive Intelligence (AI & Human Computer Interaction)
- Independent Study: Predictive Modelling for Diabetes, Obesity, and Sleep Apnea

Master of Science in Analytics, Georgia Tech, GPA: 4.0

- Specialized in Data Science & Analytics

Micro-Masters in Data, Economics, and Development Policy, MIT

- Data Analysis, Economics, Experimental Design, and Policy Analysis

Bachelor of Science (Honors) in Biology, Kings University

- Senior Thesis: Survival of murine norovirus and F-RNA coliphage MS2 on pork during storage and retail display published in International Journal of Food Microbiology
